Pet Respiratory Tent

The best protection for your pets

In any situation where your family needs respiratory protection from airborne bio-hazards and viruses, you will want to protect your family pets as well. Impertech has many years of experience in the design and manufacture of protective equipment for civilian emergencies.

In the past 20 years, Israeli civilians have twice been issued with personal gas masks, to protect them from the threat of missile attacks, potentially including biological and nuclear weapons.

Advantages

- Robust protection tent with strong seal and positive pressure system providing a Protection Factor of 10,000 PPM.
- Powerful integrated 45 liter/minute blower for ample air supply.
- Suitable for pets up to 1 meter long (??)
- Easy to erect and collapse, and comfortable for prolonged use.
- Durable system with a shelf life of 15 years at room temperature (8 year battery life)

Powered Air Purifying Respirator Tent for Pets

The respirator tents that were developed for infants in accordance with the CBRN specifications of the Israel Ministry of Defense, are also suitable for household pets. Our Powered Air Purifying Respirator Tent is resilient and robust. It folds flat for storage and can be quickly opened and connected to the air blower hose. Its battery-powered CBRN filter is designed for 15 hours of continuous operation. The tent is fully transparent so that you can check on the welfare of your pet, and it can be customized for his or her comfort with blankets, food and toys!

Assembly instructions:

- Spread the kit parts on a floor or on a flat surface.
- Spread the plastic parts in the shape of a fan.
- Spread the grass at the bottom of the kit
- Close the zipper
- Screw the Blower with its hose into the round air vent on that is on the side of the tent.
- Turn on the blower, and make sure the blower is working.
- Open the zipper and place the pet gently inside the tent.
- It is recommended to priory place food, water and a game inside the tent.
- Keep an eye contact with your pet until he/she gets used to the new environment.

Warnings:

- The kit is not intended for infants and children.
- The blower must not come into contact with water
- Store product in a dry place, not exceeding 70 degrees
